

Satellite radio provides variety and quality that are not available on our local 'free' radio. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I urge the FCC to reject the petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. Local broadcasters continue to merge and expand and are too interested in catering to the lowest common denominator. I have little or no interest in the majority of their offerings. I value my XM content and the ability to hear what I want, when I want. Thank you.
